DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 1-6, and 21-22, drawn to isolated, single domain recombinant AL2 genes, and to methods of making recombinant plants.
 - II. Group II, claim(s) 7-20, and 23, drawn to isolated, double domain recombinant AL2 genes, and to methods of making recombinant plants.
 - III. Group III, claims 24, drawn to methods for preparing a recombinant plant, comprising SEQ ID NO: 14. To the extent that groups III do not read on Groups I and II.
2. If invention Group I above is elected, restriction to one of the following is also required under 35 USC 121. Therefore, election is also required of one of (A) through (H).

Recombinant AL2 genes selected from the group:

- (A) Deletions.
- (B) Hydrophobic substitutions.

- (C) Acidic substitutions.
- (D) Mutations at position 119.
- (E) Mutations at position 120.
- (F) Mutations at position 123.
- (G) Mutations at position 124.
- (H) Mutations at position 128.

3. If invention Group I above is elected, restriction to one of the following is also required under 35 USC 121. Therefore, election is also required of one of (A) through (H) and one of inventions (1) or (2).

Recombinant AL2 genes selected from the group:

- (A) Deletions .
- (B) Hydrophobic substitutions.
- (C) acidic substitutions.
- (D) Mutations at position 119.
- (E) Mutations at position 120.
- (F) Mutations at position 123.
- (G) Mutations at position 124.
- (H) Mutations at position 128.

Mutations selected from the group:

- (1) A plurality of cysteine residues.
- (2) Mutants at position 40.

4. The claims are not linked by a single special technical feature because the invention of Groups I and II do not constitute an advance of the prior art. Mutations of AL2 were known in the prior art (Sung, et al , "Mutational analysis of potato yellow mosaic geminivirus", J. Gen. Virol. (1995), 76, 1773-1780).

5. Because these inventions are distinct for the reasons given above and the search required for the individual Group is distinct from the others, restriction for examination purposes as indicated is proper.

6. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
